Career Objective

Seeking an internship opportunity in biotechnology where I can apply my knowledge of molecular biology, bioinformatics, and laboratory techniques to contribute to innovative research projects while gaining practical experience in the field.

Academic Details

- Pursuing Master of Science from **DR. B. R. AMBEDKAR UNIVERSITY**, Agra **2023-25**
- Graduation - **Uttam institute of technology**, Runakta, Agra **2019-22**
- Intermediate - **Agra public school**, Antoni Agra. **2019**
- Highschool - **Radhaballabh public school**, Dayalbagh Agra. **2017**

Experience

- **Helix biogenesis** **03/22 – 07/22**
Training
Here I work on "Isolation and characterization of different bacteria found in aquatic culture water."

Projects

- **Isolation and characterization of different bacteria found in aquatic culture water.**
- **Phylogenetic analyses of *PIN* genes.**

Skills

- **Molecular Biology Techniques:** PCR, gel electrophoresis, DNA/RNA extraction, work in laminar airflow, centrifuge.
- **Bioinformatics:** Sequence analysis, phylogenetic analysis, use of tools like , MEGA,ClustalW.

Certifications

- **Helix biogenesis**

Interests

- Research work
- Learn new things
- Interested to learn about the lab instruments
- Lab work

Additional Information

I have experience of using some lab instruments

- Autoclave
- Laminar Airflow
- Centrifuge
- PCR
- Gel Electrophoresis
